Our commitment to our rescue dogs and our adoptive families goes way beyond the placement of a dog - we are there every step of the way - from initial adjustment to ongoing education on health and well-being.

Our organization was founded on these important principles:

All Shar Pei Savers dogs must have outstanding temperaments.

To ensure our dogs have good dispositions, thorough evaluations are performed before any dog is accepted into our rescue program.

All Shar Pei Savers dogs will be well socialized.

To further ensure our dogs are adoptable, all of our dogs are kept in loving, caring foster homes. None of our dogs are ever kept in overcrowded kennels. We believe that pre-adoption socialization in a home environment is a key element in any successful adoption.

All Shar Pei Savers dogs will receive outstanding veterinary care.

Our dogs will receive all veterinary care required to make him/her healthy before being adopted. We go above and beyond simple spays/neuters, vaccinations, and heartworm tests. If we suspect there is a problem with a dog, we will run all tests required to identify and resolve any known health concerns.

Rest assured that when you adopt from Shar Pei Savers, Inc., we do everything possible to make sure your new dog is a good fit and will become a cherished part of your family.
